Ferromatik Milacron India's Successful Open House

Ahmedabad. During 11-13th October 2012, Ferromatik Milacron India (FMI) held Open House at its Vatva based manufacturing facility at Ahmedabad, India. The event saw over 600 visitors including Plastics Processors, Suppliers, Processors' Associations, Educational Institutes, Polymer Producers and Distributors from India and abroad. Visitors took this opportunity to witness the live demonstration of FMI's India Built High-performance Injection Moulding Machines, which was the main focus of the event. Along with this, visitors took facility tour on progress.

On 11th October 2012, FMI launched;

Maxima Servo 3200 T - India's largest Injection Molding Machine

- Two Platen Injection Moulding Machine
- Robust & Compact Design
- Offers lower operating cost, reduced foot print, greater flexibility in terms of clamp stroke & daylight
- End Application Segments - Automotive, Consumable Durables, Large House ware Products, Pallets, Furniture, Industrial Products, Trash Bins, to name a few.....

Nova Servo – New Generation Energy Efficient Injection Molding Machine

- New Generation High Speed Toggle Injection Moulding Machine
- Available in a range of 50 T to 200 T
- Energy Efficient High Performance Machine
- End Application Segments - Electrical, Writing Instruments, Automotive, Caps & Closures, to name a few.....

Elektron 450 T – Largest India built All Electric Injection Molding Machine

- All Electric Machine – The Green Machine
- Energy Efficient, Fast & Precise, Clean & Quiet & Environment Friendly Machine
- End Application Segments - Medical, Packaging, Electricals, Electronics & Communications, to name a few.....

Shirish Divgi, MD, Ferromatik Milacron India said that "The new product shall expand our market footprint & help our customers to become more competitive with energy efficiency as its focus. The Large Tonnage Maxima Servo 3200 T Machine is a landmark achievement in FMI Journey so far."
